Company Description

Yash Solutions LLC is a system integration services provider with a track record of 18 years. We provide expert services and skills with leading technologies. YashOne is our flagship product that exhibits our skills and expertise in IT and we use it to help our clients to solve their IT problems. We have success in the fields of Data Virtualization, OS virtualization, Middleware management, IT tool integration. With our growing footprint we also make sure that we provide our clients with the best services and talent in the industry.

Product Profile

YashOne is an AI backed, event – trigger platform that integrates all of your IT tools into one system and provides GUI, API, CLI and ChatOps access to manage your workflows in an automated self healing fashion. YashOne helps track systems and generate custom KPIs.

Overview

YashOne makes your existing IT tools more powerful by integrating them together and manage them with AI and write workflows as if-then syntax.

Executive Summary

Yash Solutions LLC is an unique partner as we provide our customers skills and solutions which are market tested and proven on our own products. With YashOne we target the generic problem of “we are not ready yet” by implementing our technology that adapts to their existing processes regardless of their journey in terms of standardization. YashOne, our integration platform is a collection of our expert skills with more than 40 different technologies built as plugins and help us testify our image as technology partners.

Statement from Partner

Yash Solutions is committed to provide world class technological exposure to our clients. With Red Hat we are excited to add a tool-belt of world's leading technologies to our portfolio. We specifically work with OpenShift, Jboss, Ansible Tower, RHEL, OpenStack and Virtualization. We see a great partnership coming off with Red Hat and are delighted to be a part of Red Hat family.

Statement from Red Hat Connect

“Customers are looking to migrate their applications to the cloud leveraging containers as the deployment model,” said Mike Werner, Sr. Director, Global Technology Partners, Red Hat. “Red Hat container certification assures a supportable platform for all types of customer deployment models. Red Hat is thrilled to work with software partners like Yash Solutions, resulting in the world's largest commercial ecosystem for containers.”

TECHNOLOGY PARTNER

CERTIFIED TECHNOLOGY

Product Benefits

- Manage IT infrastructure and software as one unified system
- Instant feedback on services and events allows running automatic fixes
- Integrating any IT tool with any other IT tool creates a real ecosystem
- AI helps in training, evaluating and accessing information from the IT system

Use Cases

- Create automated environments on demand
- Run CI/CD across multiple tools, processes, machines and locations
- Increase adoption of technology by adapting to workflows
- Migrating between clouds, setup multiple cloud environments or work with a hybrid environment
