## Why Yash?

We are Technology Partners of Red Hat. Our services and solutions are geared to integrate technologies and get the automation process started. Projects include: CI/CD, Infrastructure, Networks, Systems, Security & Compliance along with Data Management.

Our YashOne Solution is a view of full stack open source automation.

Our Approach is to understand your existing tools and environment along with the most important objectives. We then deliver a proposal outlining our methodology to achieve your desired state.

Once implemented, we provide a knowledge transfer to your teams for you to manage and increase your automation playbooks.

### Consulting

Our consultative approach takes the time to understand your technology landscape and goals then we offer a strategy for your endpoint.

### Engineers

Our practice includes expert level engineers to work onsite, remote or offshore. We are flexible and work to your time schedule & requirements.

### Automation Tools

We are partners with a wide variety of technologies. Our solutions are built to your deliverables.
