Concept

Yash Solutions was started nearly 20 years ago as a residency partner of IBM. Since then we have partnered with many OEM's providing specialist level resources who work on complex data engagements at the enterprise level.

Ten years ago we focused on Data Solutions that led to Partnerships for Data On Demand, Data Masking along with DevOps. We then implemented a Research & Design Center in Mumbai, India where we developed our Open Source Full Stack Solution called YashOne.

Our specializations include DevOps, Automation, Data On Demand & Data Masking.

Clients include Fortune 500 Institutions such as: Healthcare Insurance, Financial, Utilities, Manufacturing & Retail Companies.

Yash Solutions partners with the best of breed technologies such as: IBM, EMC, Hitachi Data Systems, Red Hat Technologies along with many others.

Our professional services practice includes DevOps, Automation, Developers, Systems, Network & Infrastructure Engineers.

Yash⊙ne
AI powered Integration

YashOne is our version of full stack automation. Our clients can determine the best aspects for their needs then we assist in developing their own home-grown application.

We have integrations that include Jenkins, Docker, Ansible, Kubernetes, GitHub, Jira, Mongo, Puppet & Chef to name a few. We work at a deep level in Red Hat but also the surrounding tools outside of Red Hat Technologies.
